## EDUCATION

**Deenabndhu Chhotu Ram University of Science and Technology**

*Bachelor of Technology in Electronics and Communication Engineering*

Sonipat, Haryana

Aug. 2019 – June 2023

## EXPERIENCE

**Software Developer in backend**

Sept 2023 – May 2024

*Oodles Technologies*

*Gurugram, Haryana*

- Designed and developed responsive web applications backend from scratch using Node.js, achieving an increase in user engagement.
- Implemented RESTful APIs in Node.js to facilitate seamless communication between front-end and back-end systems.
- Optimized database performance and scalability using MongoDB, improving query response time.
- Collaborated with UX/UI designers and product managers to translate design prototypes into fully functional applications, ensuring technical feasibility and usability.
- Conducted code reviews and wrote automated test cases to ensure code quality and robustness of applications.

**SDE in backend**

feb 2023 – Aug 2023

*ituple technologies*

*Gurugram, Haryana*

- Designed and developed components using Node.js, HTML5, and CSS3 for optimal user backend experience.
- Maintained server-side logic using Node.js and Express.js, integrating APIs with the frontend for seamless data exchange.
- Worked on various technologies including Node.js, Express.js, and MongoDB for full stack development.
- Used Nginx server in the application for load balancing and reverse proxy.
- Leveraged Linux-based systems to enhance productivity and streamline development processes.
- Utilized Docker to containerize applications, ensuring flexibility and consistency across different environments.
- Conducted API testing with Postman to ensure robust and reliable endpoints.
- Collaborated with project managers, UX/UI designers, and other developers to ensure technical feasibility of designs.

## TECHNICAL SKILLS

**Programming Languages:** Javascript , Node.js , Java , Async programming

**Front-end Technologies:** html5, CSS3, JavaScript

**Back-end Technologies:** Node.js, Express.js, Restful- API

**Database:** SQL MySQL, PostgreSQL, NoSQL MongoDB

**Tools & Other:** DSA and Problem Solving , Git/Github, Docker, Linux, Agile Methodology , AWS

## ACHIEVEMENTS

200+ problems Solved on **LeetCode** ans still counting...

Actively enhancing problem-solving skills by working on **LeetCode**, **HackerRank**, and **GeeksforGeeks**

Received an appreciation certificate from TECHNOVA in university fest for outstanding project performance.

## PROJECTS

**AuthGuardian** | *JavaScript, Authentication Protocol Libraries, Node.js , Express*

- Developed AuthGuardian, a robust role-based authorization system utilizing Java, Node.js, and Express.js for the backend architecture.
- Implemented secure authentication protocols using the ethers library, authenticating users via wallet addresses and private keys for enhanced security.
- Developed scripting solutions to automate user authentication and enhance code functionality.
- Integrated the authentication system with frontend applications, ensuring seamless user experience.
- Mechanisms: Secure login, role-based authorizatio
- Utilized Docker to container
- Followed Agile methodologies to ensure timely delivery and iterative improvement of the project.
- Used Postman to test and debug APIs, ensuring robustness and reliability.
